OFFICE OF PETITIONS

Applicant: Vierich et al.
Appl. No.: 10/624,490
Filing Date: July 23, 2003
Title: PARAMETERIZED DATABASE DRILL-THROUGH
Attorney Docket No.: 08005.0010
Pub. No.: US 2004/0139102 A1
Pub. Date: July 15, 2004

This is a decision on the request for corrected of patent application publication under 37 CFR 1.221(b), filed on September 15, 2004 for the above-identified application

The request is DISMISSED.

Applicant requests that the application be republished because the patent application publication contains a material error, as “define any translation” is misprinted as “determine any translation,” in paragraph [0023], and “within” is misprinted as “wit”, “ translating” is misprinted as “slating” and “to” is misprinted as “m” in claim 17.

37 CFR 1.221 (b) is applicable “only when the Office makes a material mistake which is apparent from Office records.” A material mistake must affect the public’s ability to appreciate the technical disclosure of the patent application publication, to determine the scope of the patent application publication, or to determine the scope of the provisional rights that an applicant may seek to enforce upon issuance of a patent.¹

The errors noted by requestor wherein “define any translation” is misprinted as “determine any translation,” in paragraph [0023], and “within” is misprinted as “wit”, “ translating” is misprinted as “slating” and “to” is misprinted as “m” in claim 17 are Office errors, but the mistakes are minor typographical error, which are clearly understandable to one of ordinary skill in reading the specification and the claims. The mistakes are minor typographical errors, which are clearly understandable from reading the claims in which the terms are used, as terms are not read in a vacuum. The mistake does not affect the public’s ability to appreciate the technical disclosure of the patent application publication, or determine the scope of the patent application publication or determine the scope of the provisional rights that an applicant may seek to enforce upon issuance of a patent.

¹Changes to Implement Eighteen-Month Publication of Patent Applications, 65 FR 57023, 57038 (Sept. 20, 2000), 1239, Off. Gaz. Pat. Office Notices 63, 75 (Oct 10, 2000) (final rule).

Furthermore, these are not material errors since the Image File Wrapper (IFW) for this application is available to the public, as of its publication date.

The errors in this published application may be due in part to the poor quality of the text in the application. While the text is legible, the text is not clear, as the text blurry.

Applicant should file applications having larger text, which is cleaner and with sufficient clarity and contrast to permit reproduction to avoid errors in the patent application publication process. See 37 CFR 1.52.

The applicant is advised that a "request for republication of an application previously published" may be filed under 37 CFR 1.221 (a). Such a request for republication "must include a copy of the application compliance with the Office's electronic filing system requirements and be accompanied by the publication fee set forth in § 1.18 (d) and the processing fee set forth in § 1.17 (i)." If the request for republication does not comply with the electronic filing system requirements, the republication will not take place and the publication fee set forth in § 1.18 (d) will be refunded. The processing fee will be retained.

Any request for republication under 37 CFR 1.221(a), must be submitted via the EFS system and questions or request for reconsideration of the decision, should be addressed as follows:

By mail to: Mail Stop PGPUB
Commissioner for Patents
P.O. Box 1450
